

Stream No. 9

Miners River, Unakwik Inlet.

Is a large stream, mostly glacier water, connecting with Miners Lake, a red salmon lake.

No information on this.

Stream No. 10 (1 notice)

Jonah Bay, Unakwik Inlet.

Width: 20 feet

Depth: 7 inches.

Accessible for a distance of 4,000 feet, but no fish further up than 2,000 feet above mean high tide line.

Has a fine gravel bottom. Stream bed is all the way from 30 to 50 feet wide, with shallow water in places.

Sept. 4, 1925: 6 reds and a few silvers.

Sept. 10, 1926: 6,500 fish,--2,700 humps.

1927: No visit. Estimate allowed for.

Stream No. 11 (2 notices)

Siwash Bay, Unakwik Inlet.

There are several branches of the main stream.

North side has one 14 feet wide and 4 inches deep, and another 6 feet wide and 4 inches deep.

The largest comes out just south of a low timbered hill, is 24 feet wide and 10 inches deep, and has few fish in it. It is part glacier water.

Another stream on the south side is 20 feet wide and 6 inches deep and has more fish in it.

All have fine gravel bottom, but there are many glaciers up the valley.

Sept. 11, 1926: 5,000 fish all told.

1927: No visit. Estimate allowed for.

Stream No. 12 (1 notice)

East side Eaglek Bay

Width: 10 feet

Depth: 8 inches.

Is at the head of a lagoon, has a good fine gravel bottom at the mouth, but the stream bed proper above high tide line is rough boulders and a little fine stuff with it.

Sept. 11, 1926: 400 fish.

1927: No visit. Estimate allowed for.
